bringing together interconnected discussions to make explicit the complexity of the arctic region this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national regional and international level one of the intrinsic features of the region is the difficulty in the determination of boundaries responsibilities and interests against this background sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and at the same time influence national approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region this perspective lays the ground for further discussion revolving around the main clusters of governance focusing on the arctic council and the european union with the particular roles and interest of arctic and non arctic states and the impact on indigenous populations environment including the relevance of national regulatory

schemes and the intertwinement with concerns related to energy or migration strategy concentrating in geopolitical realities and challenges analysed from different perspectives and focusing on different actors and covering security and climate change related challenges this collection provides an avenue for parallel and converging research of complex realities from different disciplines through the expertise of scholars from different latitudes

groundwater is humanity's most vital supply of freshwater freshwater resources contained in aquifer systems globally are two orders of magnitude greater than those found in all rivers lakes and other surface freshwaters combined moreover approximately one half of the world's population today is dependent on groundwater for its basic needs while these truisms are widely acknowledged an additional reality is now recognized many of these subsurface freshwater reservoirs are actually transboundary formations shared amongst two or more nations in fact around 600 transboundary aquifers have been identified worldwide they underlie the territory of nearly every non island nation and are found in both humid and arid environments surprisingly though only a handful of transboundary aquifers worldwide are subject to any type of formal or informal international agreement transboundary groundwater resources are now receiving growing attention among the international community questions are being raised about how they should be managed allocated and protected what rights aquifer riparians can enjoy and what responsibilities these aquifer states might owe to neighbouring aquifer riparians this book considers all these various aspects of the management and regulation of transboundary groundwater resources it also presents case studies and explores recent efforts to engage the international community on best practices and global standards for governing transboundary aquifers as communities and nations continue to expand their reliance on these critical sources of freshwater they will have to address such issues and develop governance regimes for these shared subsurface resources the chapters in this book were originally published as a special issue of water international

there is much evidence that we have lived before and our purpose is to progress to a more advanced state the evidence also indicates that a god must exist to cause such re births on other continents and hundreds of years later the consequences of bad deeds done in previous lives explains present suffering which seems otherwise unjust future lives lie before us and from

available evidence these will be strongly influenced by our actions in our present life
